Keith's 3 Leaders

**Premier-Early
Dorsett-Midseason
Catskill-Late**

PREMIER
Keith's Vitalized Premier plants will yield 8,000 to 12,000 qts. per A. for you.

Premier Earliest Berry, Withstands Frosts

Fruit men and leading Horticulturists now admit Premier to be the best early strawberries. Berries are large, firm, bright red, a rich flavor, red to the core.

A very heavy fruiter. Berries don't run small toward end of season. It's a worthy early strawberry. Brings the highest price in any market.

Premier is planted most exclusively in this great berry section as an extra early variety. It withstands frost better than other varieties. We recommend it most highly and will guarantee our Premier plants to be genuine, to grow and satisfy.

Produces Large Yields

Keith's "Vitalized" Premier plants often yield over 1½ qts. of attractive large berries per every plant set. Think of picking 12,000 quarts of berries per acre—8,000 Keith's "Vitalized" Premier plants can be made to do it on average soil. Set plants that are grown right. It's expensive to set cheap non-productive plants of any kind.

KEITH'S 3-Leader Offer

**50 Premier ONLY
25 Dorsett
25 Catskill \$1.50**

NO DISCOUNT

(For Postage see page 22)

Dorsett (Midseason)

(See page 6 also)

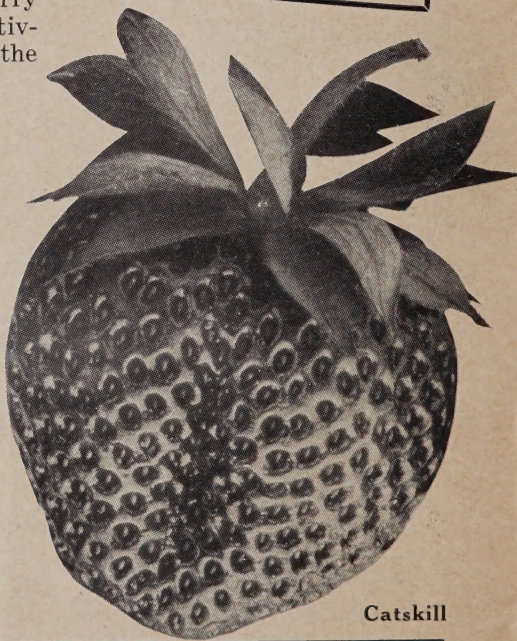

It's "Tops" in color, flavor, and for home uses. Space does not enable us to give much here regarding this fine variety, but we do want to include it as the Mid-season berry in our "3-Leader Combination," for Dorsett is a dandy good berry (see top p. 6). It has a catchy glossy red color, a captivating flavor, and in size it takes a front seat. It's just the berry for this place in this combination.

Catskill (Late)

Berries—Large
Perfect, Uniform
Attractive.

This new variety, although not extensively grown at present, is being grabbed up in those localities where it has been grown, faster than the plants can be produced. It originated at the New York State Expt. Station from a cross between Premier and Marshall, and since its introduction it has certainly made good. It is adapted to a large range of soil and climate like the Premier and in many tests has out-yielded that variety with larger berries that hold their size throughout the fruiting season. Catskill will not disappoint you.

Here are a few of the characteristics which make Catskill famous: Catskill berries are large to very large, attractive glossy red, medium sweet, and good flavor. If you haven't seen or grown the Catskill you have a big surprise coming.

Catskill

NOTE PLEASE—Premier—Dorsett—Catskill—Combination

A Home Strawberry Bed Pays Big Dividends

Fresh, Sweet, Juicy, Red Strawberries Every Day for Your Table, and Lots of Them

WHY pay 25c to 35c a quart for your strawberries when you can easily grow all you want right in your own back yard or garden? You have no idea how little time, space, and cost it will take to have plenty sweet, ripe luscious berries you want. Just think, the berries will cost less than 1c per quart.

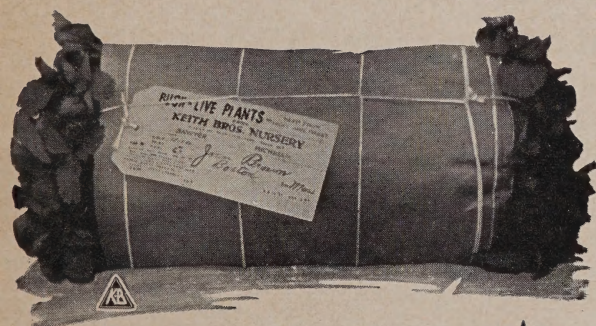

What 100 Plants Will Do

100 of Keith's strawberry plants will set one bed (4 rows) 25 feet long from which you can pick all the fresh strawberries you can possibly use. (See bottom of page.) This is what 100 Keith's strawberry plants will give you—100 or more quarts of fresh, sweet berries. And how little time, space and money it will take. Plan right now for a Keith Strawberry Bed.

SPECIAL OFFER

See bottom of page for our Special Strawberry Beds—25 ft. long by 4 ft. wide. Four good varieties, one row each.

Keith's New Way Grow 4 times More Strawberries

Here's Your 100 Plants

These 100 plants are all ready for your garden, a 25-ft. strawberry bed, a possible 100 qts. of sweet, luscious berries. All for \$1.25. (See offer below.)

KEITH'S MOST POPULAR STRAWBERRY GARDEN

(Read the above description)

25 Premier, see p. 5....	.50	SPECIAL \$1.75
25 Dorsett, see p. 6....	.50	
25 Fairfax, see p. 6....	.50	
25 Catskill, see p. 2....	.50	

100 Plants.....\$2.00 For postage see p. 22

Two of these gardens for ONLY \$3.00. You may substitute 25 Super Mastodon (page 8) in place of any one of the above four varieties for an additional 60c. One garden will then cost you ONLY \$1.95.

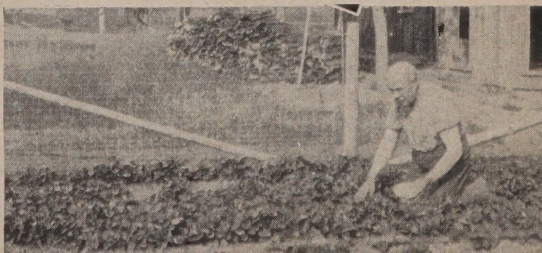

A New and Better Way to Grow More and Better Berries. Large areas are NOT needed. Grow four times more berries from same size plots. Why use more space? Keith's New Way of growing strawberries requires only one-third the space required by old way and you can harvest four times the berries. Space three parallel rows one foot apart and set the plants one foot apart in each row. If you wish a wider bed (4 ft.) set four rows. We suggest this width. Then bed 25 ft. long will take just 100 plants, 25 to the row. The bed will be 4 ft. wide and 25 ft. long.

Allow young runner plants to take root in between mother plants (the plants you set) so all plants, young and old, will be spaced 6 inches apart. Keep all runners thereafter cut off. Mulch between plants with straw, lawn clippings, etc. Mulch keeps down weeds and holds moisture.

Here's one of Keith's New-Way Gardens for You.

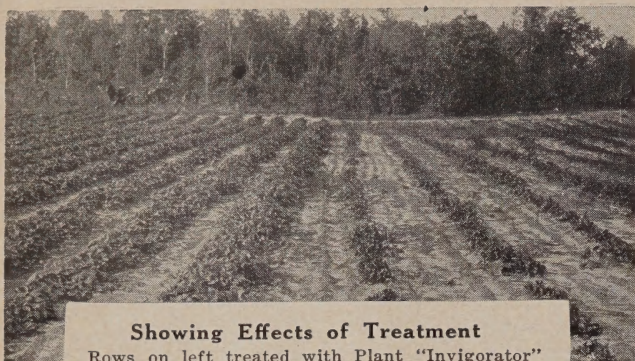

This New-Way Strawberry Garden will sure meet your family berry needs. It consists of 100 plants in four leading varieties (see Offer at left). Will take a plot of ground only 25 ft. long by 4 ft. wide. Plants are set 12 in. apart in 4 rows spaced 12 in. apart, 25 plants per row. Surround the bed with 4 in. boards set on edge to make a frame to hold mulch of straw, etc. Saves moisture, keeps down weeds, improves appearance.

This New-Way can be followed out on larger scale by making the bed longer or by making more beds with a path one foot wide in between each.

One of Keith's Popular Strawberry Beds only \$1.75. This Strawberry Bed requires only 100 plants and a small space four feet wide and twenty-five feet long. Bears enough for average family.

NOTICE—Makes Plants Grow Quick

Showing Effects of Treatment

Rows on left treated with Plant "Invigorator" before and after planting. Note their vigorous growth compared with untreated plants on right. You can see the effect of Keith's Plant "Invigorator." Treat plants with it before and after setting (see instructions at right) and watch them grow.

Use Keith's Plant "Invigorator" on Other Plants

It's very helpful in growing all plants. ROSES, FLOWERS, VEGETABLES. It's the most effective and economical, ready-available plant food you can buy.

KEITH'S PLANT "INVIGORATOR" CONSISTS of highly concentrated plant foods readily available for all plants. Gives immediate effects. Plants take it up immediately, resulting in vigorous sturdy growths. Easily applied by dissolving and WATERING PLANTS WITH IT.

RESULTS

Set Keith's Vitalized Plants for Greatest Profits

300 Plants Brought \$56.00

Dear Sirs:—I set 300 of your berry plants and sold over \$56 in berries. We had plenty for ourselves besides.

J. Quimlich, Ohio.

1,000 Plants Bring \$600

Gentlemen:—Your berry plants are a wonder. From the 1000 plants we sold over 2000 quarts at 25c and 35c per quart.

H. D. Aschman, Pa.

Mr. Bunnell near Detroit, Mich.

"Sold over \$1,000 in berries from an acre of Keith's Plants."

Keith's New Plant "Invigorator" Start Your Plants Right Keith's New Way

We are offering our customers this year our Plant "Invigorator." It sure gives wonderful results. Plants treated with it before setting start much quicker and are more thrifty and vigorous thereafter. This is especially so when the soil alongside the row is treated after planting.

How to Use Our Plant "Invigorator"

Soak the roots ONLY for one-half hour just preceding setting in water to which has been added the Soil "Invigorator." Then set them out, but first switch the wet roots (bunch of plants at a time) in moist loose soil until they are covered with fine soil like paint in a paint brush. Then set them as directed below.

Treatment After Planting

After planting, make a 3 inch trench along each side of row 2 inches from base of plants and pour in the water containing the Plant "Invigorator" in which you soaked the roots, using about one gallon per 25 plants. After the water has thoroughly soaked in the soil, refill the trench with loose, moist soil. Repeat the process in about three weeks, making the trench about 3 inches away from the plants.

Keith's Plants are "Vitalized"

By "Vitalized" we do not mean just fertilized and the like, but a whole chain of operations which insure the highest production by the plants. Special soil, cultural methods, fertilizers, digging, handling, all enter into our methods which result in our "VITALIZED" plants.

Set Keith's "Vitalized" Plants Because—

It won't take any more of your time and money to prepare your soil, set out and care for Keith's dependable, Vitalized plants than it will plants grown the old way. Why take the risk? Set only plants that will respond to your care. That's the kind Keith grow in their special plant soil.

Set Keith's "Vitalized" Plants Because—

No hanging around half the summer waiting for Keith's plants to get started. They get busy QUICK. They have the "pep" in them to do it. They are the most reliable grown and by far the CHEAPEST in the long run, for it's just as I've said. "IT TAKES JUST AS MUCH TIME AND EXPENSE TO SET INFERIOR PLANTS, AS IT DOES KEITH'S DEPENDABLE PLANTS."

Set Keith's "Vitalized" Plants Because—

Your plant cost is the smallest cost item in the whole strawberry growing game. Don't make the common mistake of trying to save on their cost and sacrifice the quality, vigor, and profits there are in Keith's vigorous, productive plants. And remember this, "CHEAP PLANTS ARE A POOR BUY AT ANY PRICE."

Set Keith's "Vitalized" Plants Because—

They are not dug along the sides of fruiting rows, they are grown for planting and thus are full of "pep" that makes them grow and produce other plants like them for you. Others make big profits from them, and I know you can.

Keith's KANNER KING

(U.S. Plant Patent No. 26)

Breaks all Records for Us.

Yields 2,280 qts. per A. per day

Keith's Kanner King tops the list in production—2,280 qts. per A. in one day's picking. At only 7c per qt. the day's picking would bring you \$159.60.

Ideal for Home Uses

Being a hardy, thrifty grower, with rich red berries, red clear through, and holding color, shape, flavor after cooking, makes Keith's Kanner King Ideal for Home Uses.

New Money-Making Strawberry

Kanner King has production, hardiness and berries of size, flavor, color and general attractiveness that brings the price every time. Read the inclosed folder for detail description, etc.

\$2.00

Senator Dunlap

(early) grows and yields well everywhere.

Here is an old standby for beginners or others. Does well in garden or field, in any garden soil. Makes good where others fail. Fine for home uses.

Why Set Keith's Dunlap

1. DOES well in any garden soil, reliable for beginners—the everybody's berry everywhere.
2. PERFECTLY HARDY in Northern and Western States. Grows well in heavy soils.
3. YIELDS large crops of uniform berries.
4. MAKES a good wide picking row of Healthy, productive plants.
5. BERRIES firm, sweet, dark red, ideal for home uses or market. Fine for table uses or for canning.
6. PLANTS not so subject to the common strawberry diseases.

Senator Dunlap

Blakemore (Early to Midseason)

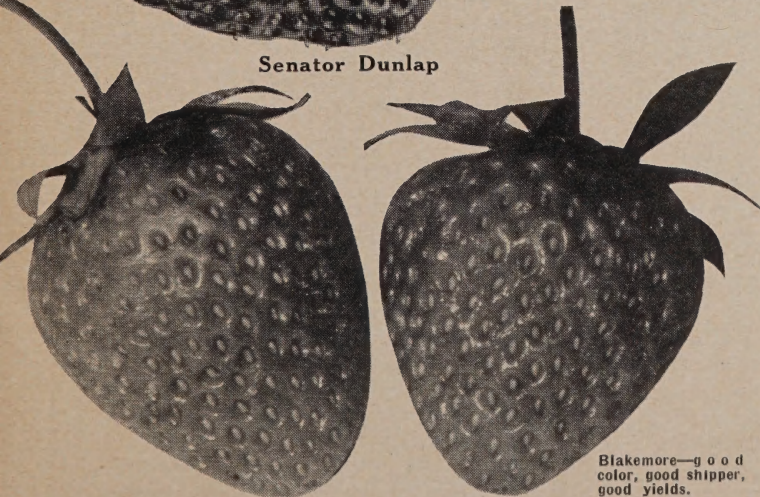

Stands out in Yields and Attractive Berries

Blakemore is a Government production, a cross between a Northern Berry (Premier) and the leading berry of the South (Missiona). Breeding counts, no guessing when it comes to Blakemore. It yields well, berries are glossy attractive red, very firm, and will remain on vines in good condition longer than any other strawberry. Does its best on the heavier soils.

Blakemore—good color, good shipper, good yields.

DORSETT (Midseason)

This NEW berry has been out long enough to establish its worthiness. Those who have grown it find it the most beautiful berry they have ever seen or tested. It really is a fine berry. I know you will like it. It fruits a lot of lovely berries with a wonderful perfumed flavor and a color that can't be beat. One bite into a Dorsett berry will sell your whole crop. It's a winner.

COMPARED WITH PREMIER

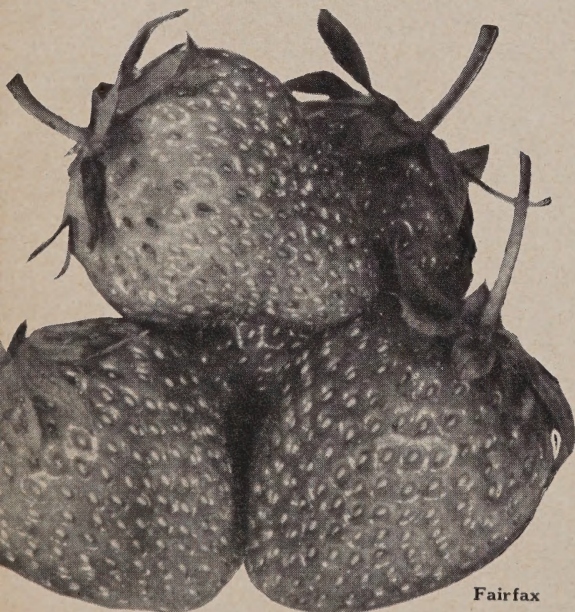

1. It's free from disease
2. Ripens a little earlier
3. Berries are more attractive bright red
4. In most cases as productive
5. Berries very firm, ships well
6. Wonderful flavor
7. Cannot be beat for canning
8. Brings top prices anywhere sold

When you set Keith's Vitalized Dorsett plants you will have berries to show the whole neighborhood and write to the papers about—you will take the "GUESS WORK" out of berry growing.

Fairfax

Dorsett. The Berry with a Winning Flavor

FAIRFAX (Medium Early)

Early with Long Fruiting Season

Fairfax is a Government cross between Premier and Royal Sovereign it is believed—anyway, it is a dandy variety with its handsome attractive big berries, with their wonderful perfumed flavor which no strawberry has yet possessed. Fairfax is going to climb fast and hold high ranks in the strawberry world. Darker red than Dorsett. Many think it's a better berry for home use.

These Are What Make Fairfax A Leader

1. A sweet, perfumed flavor, unlike any other berry.
2. Large, attractive, uniform berries of beautiful red.
3. Early, but long fruiting season.
4. Hardy, healthy, practically disease free plants.
5. Always makes a good number of plants.
6. Berries firm, solid, and medium to large.

The New AMBROSIA

**Latest of All Strawberries
with SIZE, COLOR, QUALITY**

Ambrosia is so late it escapes those late frosts that so often kill the blossoms. It's THE BERRY that beats Jack Frost every time. It ripens its large yields of big berries after other varieties are through. Other varieties wind up in June, Ambrosia goes on into July. Bridges the gap between spring and fall-bearing varieties, in this locality. Ambrosia is the LATEST of Late Spring Varieties.

Ambrosia

Big Berries with Color & Quality

No trick at all to fill a quart box with 25 to 30 Ambrosia berries, and they are glossy, attractive all over with a good strawberry flavor, that flavor that makes you want more.

Be Sure to Plant an Ambrosia Bed This Year

SPECIAL Introductory Offer on front cover as well as at right.

(Regular prices bottom this page.)

Dr. Burrill (Early)

Can be grown in any soil—even hard clay or heavy loam, such as found in Illinois or Iowa. Easily grown, an ideal variety for beginners. Plant habits and berries resemble Senator Dunlap very much. Some are of the opinion that they are identical. We offer them to our customers at the same price as the Senator Dunlap. Berries dark red and sweet, good for canning and preserves. **Prices below.**

Keith's Selected Plants, Grade No. 1-A

This Grade includes those plants that grew in the more open parts of the strawberry row, thus giving them more open space to develop with larger crowns and root-systems than the average run of plants in the rows. They are larger and more productive. Those wishing these selected plants can get them at very little extra cost. They should get their orders in early for we always sell out of this grade before the end of the season. See PRICES in Strawberry Price List on this page.

NEW Grand Champion (Mid-season to Late)

We offer this new variety in a larger way this year as heretofore we have never had enough plants to supply. It has a long fruiting season, commencing with the Premier and lasting to the end of the season. Rather unusual. The yields are large, the berries are large to very large, bright red with a sweet rich strawberry flavor. It's an attractive fancy berry. Plants are hardy good thrifty growers always making a good wide fruiting row. It's fast coming to the front and we trust our friends and customers will start with Grand Champion at this time.

Mastodon EVER-BEARER

World's Most Famous Berry

12 REASONS WHY

**Keith's Super-Mastodon Plants Win—
You can't beat them.**

1. Brings you cash 60 to 90 days after planting.
2. Bears well in Garden or Field culture.
3. Grows and bears big crops in garden soil.
4. Berries largest of any known Everbearer.
5. Bears 3 crops instead of one—Fall, next Spring and Fall.
6. Berries uniform and large.
7. Berries sweet, highly flavored, not soft.
8. Berries can't be beat for dessert, preserves, etc.
9. Produces big, sweet berries from July to Nov. Only cold freezing weather stops them.
10. Bears well in Spring at usual strawberry time.
11. Plants are hardy, healthy—don't winterkill.
12. Produce many young plants—makes wide row.

Make Quick Money with Keith's Super-Mastodon Plants

Give Keith's Super-Mastodon plants all they want to "eat and drink" and they certainly will bear a lot of berries for you. They begin to bring you in money in 60 to 90 days after you set them out and bring top-notch prices. Here's what they can do for you: \$60 from a bed 33x35—M. Marshall (Mich.). 350 qts. from 300 plants—P. R. Amber (Calif.). \$213 from 1/10 Acre—J. Barlow (Mich.). \$380 from 1/4 Acre—Mr. Parrish (Mich.). 300 plants supply family of 8—M. Kurtz (Ohio). 576 qts. per Acre per day (\$216)—Keith's record. \$20 from small bed (200 plants)—W. Jones (Pa.). Berries in 90 days after planting—W. White (Ill.). Started to bear in July—Mrs. J. Smith (Ohio)

Keith's Super-Mastodon plants will also bear a big crop following spring, making two crops per year.

Prices of Keith's Super-Mastodon Plants

25 for \$1.00; 50 for \$1.75; 100 for \$2.50; 250 for \$5.00; 500 for \$7.00; 1000 for \$12.50.

Postage p. 22

EASY TO GROW

To get best results with Keith's Super-Mastodon everbearing plants, we suggest you follow "Keith's New Way." See page 3.

Keith's Scarlet Gem

BEARS IN 60 TO 90 DAYS

Keith's Scarlet Gem plants sure are everbearers. Plants set this spring begin bearing in 60 to 90 days and keep it up until snow falls, and the same plants also bear the next spring.

Here Are Some of Gem's Leading Characteristics

1. Berries above average in size and are very uniform.
2. Berries very firm; bright glossy red. Stands shipping and handling well.
3. Rich strawberry flavor.
4. Many young plants under conditions where other varieties fail.
5. Plants hardy thrifty growers. A good variety for Home Gardens or Field plantings.
6. Red clear through and all over.

Keith's NEW Strawberries

← **Uncle Cap** ^{Sugar Sweet} Here's one of Keith's new strawberries. It was the biggest, sweetest, and most suitable SHORTCAKE berry out of 5,000 seedling strawberries. The berries are large, very sweet, medium bright red. They require scarcely any sugar. **Price, 25 plants for 75c; 50 for \$1.25; 100 for \$1.75.**

Joan (Late) This berry came to us direct from northern France. We heard tourists tell of the beautiful big berries they saw in France and Belgium, so we asked our Bureau of Plant Industry at Washington, D.C., to get us one of the best varieties grown in that country and they sent us this variety, Joan. The berries are delicious, sweet, large, bright red. Blooms are not perfect, some other variety should be planted with it to fertilize its blooms. We suggest Uncle Cap. Any of our varieties are O.K. **Price, same as Uncle Cap.**

Uncle Cap

PAYMASTER

*A Brand New Strawberry
Offered here for the first time*

Six years ago we made the cross (Premier with Gem) which gave us Paymaster. There were over 3,000 seedlings, but this seedling (Paymaster) was outstanding from the start. We were after a new berry, better than the Premier, and we got it in Paymaster.

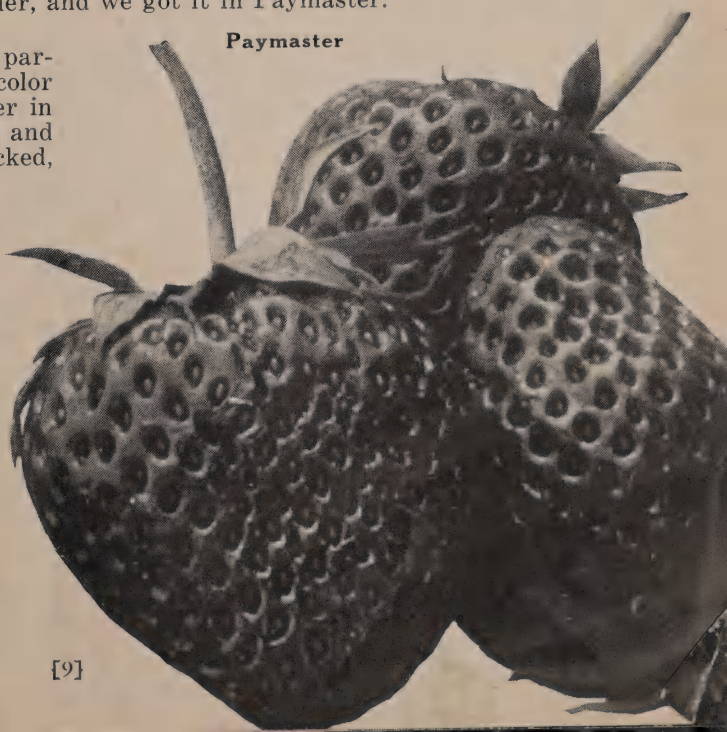

Better than Premier (one of its parents). Paymaster has size and color equal to the Premier, but is better in flavor, firmness, canning qualities, and freedom from disease. Easily picked, ships well, and escapes frosts.

Because of the scarcity of plants, and the newness of the variety we want what plants we have to go around, therefore we cannot allow more than 25 plants to go to any one person or family. Prices postpaid. Paymaster plants:

6 for \$1.00; 12—
\$1.75; 25—\$3.00

PAYMASTER
Will Pay Your
Bills

Paymaster

ASPARAGUS—\$1000 per Acre

Grow Asparagus and harvest as much as \$1,000 per A. It's an early spring cash crop, bringing money in early spring. One planting lasts a lifetime. We list the Mary Washington, a thrifty, quick grower with long, heavy, tender stalks. An excellent variety for home or field uses. Prices on this page.

SPECIAL OFFER

WHY NOT START A BED of Asparagus and Rhubarb this year? Our offer—a money-saver. Set roots 16 in. apart.

RHUBARB

Asparagus Mary Washington

Everybody likes rhubarb sauce and Pies and the Rhubarb is so easily grown. It takes the place of fruit on the family table at a time when fruit is costly. The Victoria variety we are offering this season has real red stalks, the kind that make those attractive pies and sauce. We have clump plants for you this year,—will supply cutting stalks second year. Prices on this page.

Keith's Hardy Climbing Roses

5 FOR ONLY \$1.95 Postage See Page 21

(One each of the five Climbing Roses)

A collection of five winter-hardy Climbing roses in five different colors, different shaped blooms. All have healthy attractive green foliage.

Paul's Scarlet: (New). Scarlet-red double blooms very attractive. If there ever was a red climber this is one. Awarded Gold Medal by American Rose Society. Each 45c; 5 for \$1.25.

Climbing American Beauty; Carmine-red, early large blooms 3 to 4 inches across on individual stems, fine for cut flowers. Each 40c; 3 for \$1.00.

Yellow Rambler (Goldfinch). Blooms in clusters of lasting orange-yellow. Buds cupped, attractive. A free bloomer. Each 40c; 3 for \$1.00.

Dr. Van Fleet (New). A new most beautiful climber. Buds cupped with curled petals resembling greenhouse roses. Shell-pink glossy blooms on long (12 in.) stems. Wonderful for cut flowers. Each 50c; 3 for \$1.35.

Silver Moon. Pure white blooms 4 inches across. Buds beautifully cupped. One of the best. Each 35c; 3 for 90c.

Keith's Everblooming Hardy Roses

5 FOR ONLY \$1.90 Postage page 21

These Everblooming Roses are hardy, vigorous growers, blooming all summer. Will stand most winters.

Golden Rapture. New Rose. Pure clear yellow pointed buds opening into large double dazzling yellow blooms. Long stems. Each 50c; 3 for \$1.35.

Gruss an Tiplitz. Attractive flaming crimson. A continuous bloomer, very fragrant. Each 50c; 3 for \$1.35.

Edith Perkins. Rich salmon-pink blending into an attractive orange. Long stems. Each 50c; 3 for \$1.25.

Caldonia. The finest and most attractive white everbloomer. Beautiful long buds, very fragrant. Each 40c; 3 for \$1.00.

Mrs. P. S. Dupont. Long pointed rich yellow buds opening into clear yellow blooms. A continuous bloomer. Each 40c; 3 for \$1.00.

Keith's Cultivated Blueberries

Greatest Development in Years

This new development, added to the present list of fruits, give fruit-lovers a new rare treat, and afford growers an opportunity to realize some of the largest returns yet from their soil. It takes only 1000 Cultivated Blueberry

plants to set an acre and the returns from that acre will run from \$2700 to \$3600. This is what takes place—a single Cultivated Blueberry Bush will produce from 18 to 24 pint boxes of berries which bring the acre yield from 18,000 to 36,000 pints per acre, and they wholesale for at least 15¢ per pint or \$2700 to \$3600 per acre. A Blueberry Planting, whether large or small, will bring in more and quicker money than a fruit orchard.

Planting Lasts a LIFETIME

One planting of the Cultivated Blueberries in your garden or field lasts a lifetime, and they begin to bear when the plants are four years old, sometimes three. This is why we recommend our 3 or 4 year (fruiting size) plants. You will get berries so much sooner, and more sure of good growth than when the 2-year size is planted.

WILL GROW ANYWHERE—Garden, Lawn, Field

Keith's Cultivated Blueberries will grow anywhere—a few bushes at one end of your garden—as a lawn bush (hedge or otherwise)—or in your field, will surprise you with their BIG, BEAUTIFUL BLUE berries, five times larger than wild ones found in swamps, berries large as grapes, with a delicious Blueberry flavor, and lots of them. Note the clusters on the 5-year-old bush shown below.

EASILY GROWN—How To Grow Them

Garden Culture

Garden Culture: The only thing out of the ordinary in growing Keith's Cultivated Blueberry is the soil preparation. They will grow anywhere, and your soil can be made suitable with little effort. All you have to do is to see that the soil is moist, loose, and acid. To accomplish this we suggest the following. Dig a hole 16 in. square, 12 in. deep and fill with a mixture of one-third your soil and two-thirds acid peat, leaf-mold, marsh soil, or better yet use our Acid Peat Humus in which we guarantee our Cultivated Blueberries to grow. (See Offer on this page.) Pack the soil mixture firmly in the hole and set the bush in the middle. Water thoroughly. Don't let the soil become dry at any time.

1-Yr. Plants

These are only rooted cuttings too small to be sold to the public. They should be grown at least another year in the nursery row.

2-Yr. Transplants

These are rooted cuttings that have been grown one year in the nursery row. They are well rooted and have a top growth of 6 to 8 inches. Will fruit the second summer after planting. They will be sent you with a small ball of black soil and acid peat humus on their roots, enough for 2 years' growth. Prices page 12.

3-Yr. Transplants

These plants have a 3 years top growth, well branched, 10 to 16" high and will fruit this summer. The root system is so large they have to be shipped with burlap around them. We include ample Acid Peat Humus for two years' growth. The plants will ship out about 6 to 8 lbs. each. Prices page 12.

5-yr. Blueberry Bush

Note loaded Clusters of Large Berries. Many ½ inches and over (see picture above). Three to six bushes will supply you with Blueberries all season.

Commercial Culture

Select a fertile acid soil, such as you'd find in a drained Blueberry (Huckleberry) marsh. It must have ample water. Wild Blueberries (Huckleberries), white cedar, leatherleaf, red maple all indicate a suitable soil. Low meadow lands are often suitable. Set plants 5 x 8 ft. (about 1000 per A.). Write us for further information. We will be glad to help you.

KEITH'S Acid Peat Humus

Ideal for Blueberry Growing. This Acid Peat Humus has the right acidity and contains the necessary organic matter and humus ideal for the successful growing of the Cultivated Blueberry. In it they will grow and produce their big, beautiful berries. We recommend it for this purpose. It should be mixed 2 to 1 (in volume) with ordinary soil. The more acid and the more humus in your soil the less Keith's Acid Peat Humus necessary.

It is also very beneficial in building a lawn, enriching your garden soil, and the soil around shrubs, roses, etc., and the growing of strawberries. It's a soil builder and makes plants grow. PRICE: 2-bu. bag \$1.00; 4 or more at 90¢ each. Sent by freight unless otherwise instructed. No discount, not prepaid

4-Year Transplants (Bearing Size and Age)

These plants are really bushes, and will fruit a crop of berries the first summer. For quick yields, we recommend these plants. You will save at least three years by setting this size and have big beautiful Blueberries this Summer. The tops are 16 to 24 inches high, branches with numerous fruiting buds. The root system is large and massed with black acid soil and we include plenty Acid Peat Humus to last them two years. Shipping weight will be 8 to 12 lbs. per plant. Prices page 12.

4-Yr. Old Bush

Our Different Sized Blueberry Bushes

Here we show you the different sizes of our Blueberry Bushes. The larger sizes (4-yr.) will bear for you this year. Note mass of roots and soil we send on them.

3-Yr. Old Bush

2-Yr. Old Bush

Keith's Cultivated Blueberries

*The Greatest Development
in Fruit in Years*

**NOW YOU CAN GROW YOUR
OWN BLUEBERRIES**

Took Years

After years of careful selection from among the wild blueberry (often called huckleberries) Government plant breeders have developed this Giant Cultivated Blueberry.

Larger Than Wild Kinds

It's somewhat like its wild relatives but much larger (5 times), sweeter, better flavored much more attractive and productive.

Easy to Grow

We used to think blueberries would grow only in marshy locations. Now they can be grown, with very little soil preparation, right in your garden, back yard, as easily as roses or shrubs.

CULTURAL DIRECTIONS

For cultural directions for gardens or fields turn to page 11. They will be sent you FREE with your order.

THESE CULTIVATED BLUEBERRY BUSHES have been planted for 8 years. Note their size. Many bushes produced 18 pint boxes this season—at the rate of 18,000 pints per A. MORE PROFITABLE THAN APPLES.

SPECIAL OFFER

To introduce our new Cultivated Blueberries in your locality through you, we offer you this special allowance on their cost.

1 Rubel 2-yr. size	\$0.65
1 Adams 2-yr. size.....	.65
1 Pioneer 2-yr. size.....	.65
Total	\$1.95

**3 Plants
Special
\$1.75**

FREE

With each order for one to five of our 2-yr. cultivated Blueberries we supply free ample Acid Peat Humus (p. 11) to last for two years' growth. We suggest, however, you prepare for additional years' growth by mixing with your soil additional Acid Peat Humus.

Acid Peat Humus

This Humus is plenty acid for the best blueberry growth and we highly recommend it for use in preparing your soil for the growing of the Cultivated Blueberry.

RUBEL (Early)

An early to late season variety. Has a long fruiting season, begins around 4th of July, and lasts for 6 weeks. Bushes hardy, healthy, very productive. Fruits every year. Berries large, sweet, fine for pies. Very dependable variety, which bears a lot of berries.

ADAMS (Midseason)

Ripens in early July, yields for 5 weeks. Bushes hardy, upright growth (5 to 6 ft.). Berries deep blue-black, large, mild, sweet flavor, liked by everyone. Will yield big crops and as heavy producer as Rubel.

Ready-to-Bear Blueberry Garden

(4-yr. Transplants—24 to 30 in.)

To get a crop of big blueberries this coming July set Keith's bearing 4-yr Transplants. Bushes have a large amount of black soil on roots. Ball of soil and roots have to be wrapped in burlap. See and read p. 11.

Your choice **\$400**
Any 3 above varieties

All 4 Varieties listed above **\$500**

(Shipped by Exp. or Fgt.)

Parcel Post or Express

Because of the soil on their roots our Blueberry Plants ship heavy. For postage figure 5 2-yr. plants to equal 100 strawberry plants (see p. 22). Three and 4-yr. bushes come cheaper by Exp. or Fgt.

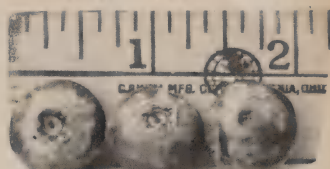

PIONEER (Early)

Our earliest variety. Ripens a week ahead of Rubel or Adams, with berries larger than either. Many of the berries over 2 inches around, covered with beautiful blue bloom, very attractive. Flavor mild but pleasing. One of the best for desserts. Bushes low spreading, globelike (4 ft.). Berries so large that 3 of them measure 2 in. across.

JERSEY (Late)

Latest variety we offer. Follows Adams about 5 days. Berries very large, firm, have a pleasing rich blueberry flavor. Bushes upright, more spreading than the Rubel. A NEW variety, considered to be the finest. We are sure you will like the Jersey.

PRICE: 2-yr. bushes, each 75c:
3—\$2.00; 5—\$3.25; 10—\$5.00;
3-yr. bushes, each \$1.15: 3—\$3.00;
5—\$5.00; 10—\$8.25.

PIONEER—Over 1½ in. through. Large as Cherries, easier to grow.

Look at the size of these blueberries. Aren't they BIG ONES? You can now grow blueberries like them right in your garden, back yard, or lawn when you set Keith's Cultivated Blueber-

Red Raspberries

Twice Government Inspected

Keith's Red Raspberry plants are twice inspected by State Inspectors. You will find them vigorous, exceedingly healthy and very productive. It takes only a few (25) plants of this kind to give you all the red raspberries you can use in a family of three to five. For your garden set plants 2 ft. apart in rows, 5 ft. wide.

CHIEF (EARLY)

Chief Best For Home Use

A comparatively NEW Red Raspberry going at standard prices. The berries are not as large as the Latham, but are sweeter, a much brighter lasting red, and ripen 7 to 10 days earlier. For these reasons, many growers prefer it to Latham. Home gardeners like it better—has a better red raspberry flavor and sweetness.

Canes are sturdy, strong and withstand our northern winters (Chief, like Latham, was developed at the Minnesota Expt. Station).

(PRICES for all Red Raspberries p. 15)

LATHAM
(Late)

LATHAM (LATE)

Latham is the leading Commercial Red Raspberry. There are more Latham planted than all other varieties put together. Among red raspberry growers, those who know, it's Latham "2 to 1," every time. Set Keith's TWICE INSPECTED Latham every time for greatest results. Prices, page 15.

1. Berries large, firm, bright red.
2. Holds color after canning.
3. Picks easily, not hid in bushes.
4. Plants very hardy.
5. Canes strong, don't break.
6. Yields big crops.
7. Berries hang on bushes well, don't crumble.

TAYLOR NEW
Midseason
To Late

INDIAN SUMMER
New Everbearing

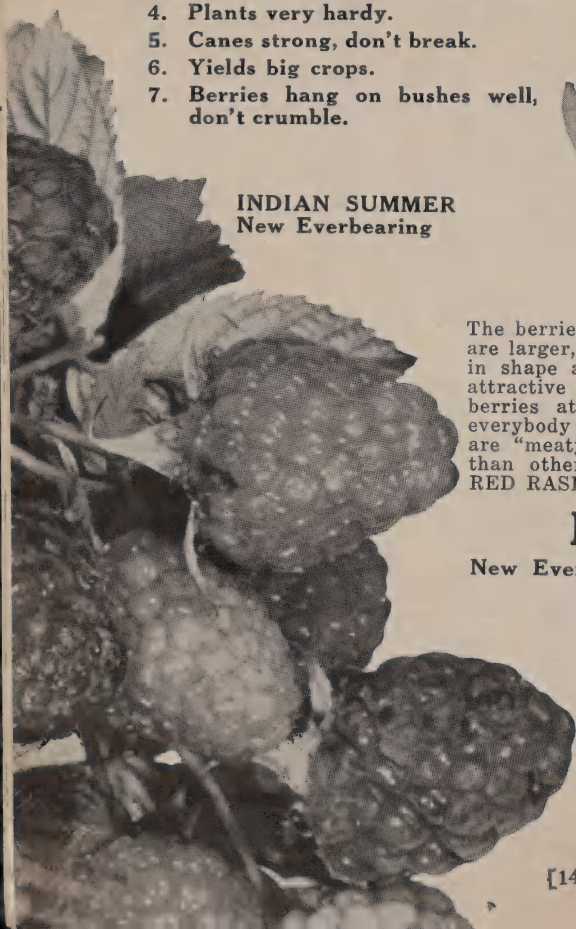

TAYLOR (NEW) Midseason To Late

The berries of this new "Red" resemble the old Cuthbert but are larger, brighter, and not as sour. They are large, uniform in shape and size, firm, don't crumble, and are a beautiful attractive bright red. This snappy red color, and large firm berries attract discriminating buyers and move Taylor to everybody where other varieties don't sell. And the berries are "meaty," they actually supply 30% more real raspberry than other "reds." TAYLOR HAS EVERYTHING THAT A RED RASPBERRY SHOULD HAVE. Prices p. 15.

INDIAN SUMMER

New Everbearing Red Raspberry—Yields TWO CROPS Instead of One

Indian Summer is decidedly superior to all other everbearing Red Raspberries. It not only bears a crop of berries in June (the usual season for reds), but during the autumn months, beginning in early September and lasting for six weeks. Think of it—TWO CROPS INSTEAD OF ONE. And there are lots of berries. Other everbearing "reds" do not bear many berries during the fall, but Indian Summer is loaded. The berries are large, attractive, medium red, and of good quality and flavor. You will like them as well as any "reds" you have ever eaten. And THERE IS MONEY IN THE AUTUMN CROP FOR YOU—lots of berries, lots of ready cash. Set Indian Summer this Spring. We know you'll like this NEW EVERBEARER. It's the best yet. Prices p. 15.

Keith's Black Raspberries

3¢
Per
Qt.

Why be without all the fresh Black Raspberries you need for pies, jelly, jam, etc., when 25 of our twice-Government inspected plants will supply all the berries you need at less than 3c per qt.? Set a few plants this spring in one of the gardens or along your yard fence and have plenty of FRESH BERRIES.

Cumberland (MID-SEASON)

Cumberland is the leader in the black raspberry "family". Growers plant more Cumberland than any other variety. WHY? Because Cumberland is a very reliable yielder of large crops of marketable berries. You can depend upon Cumberland when others fail. The canes are hardy and strong—don't break over easily with their loads of big berries. Cumberland is also a very suitable berry for home use—berries large, not seedy, well flavored, and there are lots of them. We know Cumberland will please you in every way. Prices p. 15.

New Logan (EARLY)

New Logan is the EARLY Black Raspberry, ripening in most cases five to seven days ahead of the Cumberland, and for that reason is a profitable market berry. The berries are not as large as the Cumberland, but they are unusually firm, standing hauling and handling above the average. The berries are "meaty" with a very good flavor and attractive glossy black. New Logan is one of the best Black Raspberries and it ripens early. OK for home use. Prices p. 15.

New Varieties

We have only a few plants in these three new Black Raspberries, but as long as they last we would be pleased to supply. All three varieties have been found worthy by the New York Expt. Station. If you wish further information on these varieties write us. The three varieties are Bristol (early), Dundee (mid-season), Naples (late). Price each variety 12 plants \$1.00.

Cumberland

Keith's Blackberries

Eldorado

An old standby. Canes vigorous, upright, sturdy, strong, and need no winter protection. Most blackberries grown in gardens or field culture are Eldorado. They are very sweet when fully ripe, not seedy, firm for jams, jellies, they stand shipping and handling well. Prices on bottom of page.

Alfred

Big, black, glossy berries 1½ in. long, without a core and almost seedless. An Alfred is all berry. Sends out heavy producing fruit spurs bearing loads of large giant berries; 7 to 10 days earlier than other blackberries and continues about as long as the Eldorado. Considered one of the best for table use, pies, jam, etc., for it is meaty and has practically no core as have other blackberries. See prices below.

Dewberry

"GIANT BLACKBERRY"

"Giant" Blackberries; they grow on vines instead of canes, trained on trellises or wires stretched between posts; berries sweeter and larger, earlier than blackberry; ripen 7 to 10 days earlier, bring highest prices in stores and markets. For home uses, they are away ahead of blackberries.

Keith's Fancy Grapes

RED-WHITE-BLUE

Leaders in Quality, Flavor and Juiciness. The Best for Home or Field Uses.

CACO red (Midseason to late) A wonderful New Grape with amber-red attractive berries. Has a distinct sweet catchy flavor resembling that highly-prized European Grape, the Muscat. Given highest reward by Amer. Institute of N.Y. Caco is no common grape,—it is a classy, winning outstanding red grape.

PRICES (2-yr. No. 1 plants)

	Each	3	10	25	50	100	200	500
Caco (red)	\$.35	\$.85	\$2.50	\$5.00	\$9.00	\$17.00

Fredonia 3-yr. plants (bearing size)	.40	1.00	2.50	5.00	8.50	15.00		

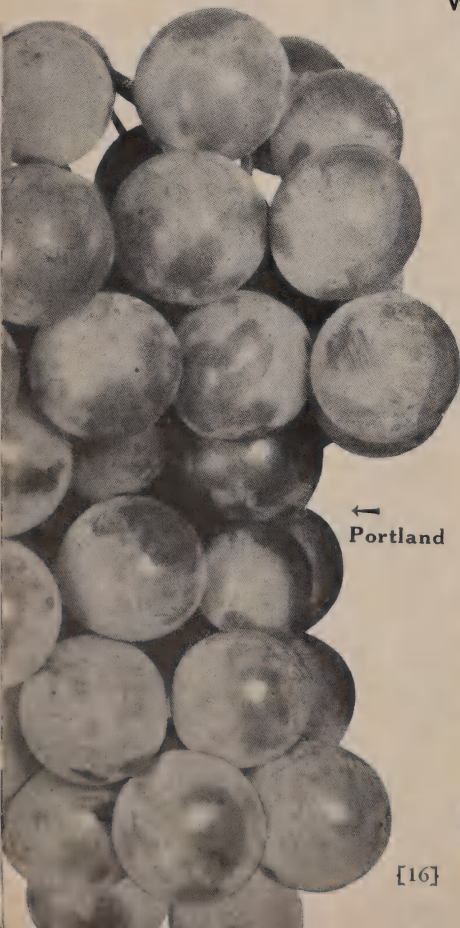

Portland (Early White) Another prize winner. It's the hardest, sweetest white offered. Don't winterkill like other white grapes. Honey-sweet flavor like Calif. grapes. "Top-notch" for juices, or other things made from grape juices.

Fredonia (Early Blue) A remarkable variety to say the least. The best for home uses. Makes delicious jams, jellies, pies, juices, with flavors unlike others made from common grapes. For "eating out of hand" just taste them and you'll want more. Here's your chance to get a grape that will sure please and delight you, and it's hardy.

Field View of

Keith's Ameliamums

All those large beautiful blooming bushes you see in this field of Keith's Ameliamums grew from plants set in the spring. Plants just like we will send you. Note those big beautiful blooming bushes in the foreground, over 350 individual blooms on a single bush. Bushes 2 to 3 feet across. Bushes like these would make a beautiful border along your walk, drive, front porch, anywhere. They grow quick.

Keith's Ameliamums

Plant Them for Masses of Early Flowers

They grow, in 90 days or less, beautiful "Balls-of-Blooms," 2 to 3 ft. across and not over 2 ft. high. The most attractive quick-growing flowers for you to set, and they grow anywhere in any soil where other plants grow. Bloom from Aug. 'til snow flies. We offer them this year in five different colors, **YELLOW, RED, BRONZE, PINK, WHITE.**

YELLOW Ameliamum—Masses of orange-yellow double flowers—a solid "Ball-of-Blooms" 30 to 36 inches across, 24 in. high. You'll have thousands of blooms from Sept. on till the ground freezes. Each 45c; 3—\$1.00; 10—\$2.50.

RED Ameliamum—A real wonder. More visitors raved over this "mum" than any other "mum" we grew. Has a catchy rust-red color, double blooms 2 in. across, massed all over the bush (18 to 24 in. across 24 in. high). Sept.-Oct. Most unique addition to the "mum" family. Each 45c; 3—\$1.00; 10—\$2.50.

BRONZE Ameliamum—Deep golden bronze, changing into lighter shades. A profuse bloomer from late Aug. into Nov. 18 in. across, 18 in. high. A solid ball of Bronze. Each 30c; 3—75c; 10—\$1.50.

PINK Ameliamum—Double apple-blossom pink changing to lighter lavender-pink. Solid dense bloomer, round as a ball, 2 ft. across. One of the earliest bloomers, Aug. into Nov. Each 25c; 3—60c; 10—\$1.25.

WHITE Ameliamum—No collection is complete without a white "mum." Its pure white shading to tinges of light pink, blooms early, lasts until snow falls. Individual blooms and bush growth like the Pink Ameliamum. Each 25c; 3—60c; 10—\$1.25.

CULTURAL DIRECTIONS

Select a well drained location in the open, they will do well in partial shade. Work up soil 6 to 8 in. deep, mixing in 1 lb. of good grade of fertilizer per 10 sq. ft. Pack soil firmly, set plants 2 to 3 in. deep, and space them 24 to 30 in. apart. Don't crowd them.

SPECIAL OFFER

Here we offer you our five selected Ameliamums at bargain prices. You SAVE \$1.15. Two plants in each of the 5 colors. **10 PLANTS IN ALL for ONLY.....\$2.25**

(Postage same as 100 strawberry plants. See page 22.)

Here is a single bush of Keith's Ameliamums taken from the field shown above. Over 300 blooms. It is 24 in. across and 30 in. high. Grown from just one plant set in June, plants just like we'll send you.

Keith's Korean Hybrid Chrysanthemums

Very hardy, stands winters anywhere. This class of "Mums" is very popular these days because of their many colors, different bush growths, shapes and shades of flowers. They are a delightful surprise to everyone who plants them. Every plant different—different color, different growth, etc.—still they are all attractive and pretty. Some flowers single, some double, some 4 or more in. across. Blooms during September until ground freezes hard. Supplies cut flowers all this time. Postpaid.

Price (sure-to-bloom plans) 5 for 50c; 12—90c; 25 — \$1.65; 50 — \$3.00; 100—\$4.95.

SPECIAL OFFER

90¢

Keith's Hardy Garden Chrysanthemums

Will give you an array of beautiful attractive blooms in many colors, from late summer 'til freezing weather. You don't have to wait a year for these gorgeous floral effects. They come quick, begin in August and last until freezing weather. And you will have them another year. All these attractive catchy flowers at one-half the price of other flowers. You'll have flowers all Fall.

We list just the most attractive varieties—just those that visitors to our "Mum" garden went "wild over" last Fall. Every variety is a winner in its kind.

Early Bloomers

Early Bronze (Ponpon type, 20 in.).—Blooms early August through September. Flowers deep orange-bronze. Plants hardy upright bushy. Each 20c; 3—50c; 10—\$1.00

Early Yellow (Ponpon type 20 in.).—Blooms with Early Bronze. Flowers like little yellow buttercups. Rich orange-yellow on long stems. Each 20c; 3—50c; 10—\$1.00

Pigmy Gold (Korean Ponpon type).—Very bushy "cushion type." Early Bloomer. Flowers like little "butter-balls" 1 in. across on long stems. Bright lemon-yellow very double. Plants 24 in. high, 24 in. across. August until November. Each 30c; 3—75c; 10—\$1.50

Alegonquin (Korean-U. S. Dept.—Agri.).—Bushy growth 2 ft. high. Flowers bright lemon yellow, feathery, 2 in. across. Very attractive and very early, August through September. Flower lovers like it. Each 25c; 3—60c; 10—\$1.50

Manantico (Korean from U. S. Dept. Agri.).—NEW Bushy habit much like our Ameliamums. Rose-red flowers 2 in. semi-double. Very attractive, hardy. One of the earliest reds, August-September. Each 35c; 3—95c; 10—\$1.95

Sandra (Bushy cushion type).—NEW. "Ball-like" growth like our Ameliamums. Hundreds of rusty-red flowers all over the well shaped bush. Attracted more visitors' attention than any other variety we have. Its catchy red color "got" them. Early September until winter. Each 50c; 3—\$1.35; 10—\$3.00

Midseason Bloomers (Sept. on)

Tasiva (White); Bushy, low-growing 24 in. high. Flowers clear snow white, "whitest of white Mums." Flowers 2 to 3 in across lace-like, double. Each 30c; 3—75c; 10—\$2.00

King Midis (Yellow). Flowers just like Greenhouse Mums, 3 to 4 in. across, very double. Canary-yellow. Long stems. September-October. Bush upright 30 in. Each 30c; 3—75c; 10—\$2.00

Dazzler (Red).—Bushy, upright 24 in. Flowers 3 in. across "dazzling" red, double, lasting. You will fall for Dazzler. Each 25c; 3—85c; 10—\$1.50

Jewell (Lilac-pink). Ponpon type with flowers 1 in. across "dazzling" red, double, lasting. You will fall for Dazzler. Each 25c; 3—85c; 10—\$1.50

Burgandy (red) Korean type. Flowers high wine-red, deeper red centers, 2 in. across. Very hardy, bushes 24 to 30 in. tall. Flowers on long stems. A winner. Each 30c; 3—75c; 10—\$2.00

Little Bob (Mahogany-red). Bushy to upright, 18 to 24 in. tall. Flowers mahogany-red, double, button-like. Bushes covered with blooms. Late September to November. Each 40c; 3—\$1.00; 10—\$2.50

Goblin (Bronze).—Fine for Halloween decorations. Bush spreading to upright. Flowers orange-bronze double, lasting. A dandy late variety. Each 30c; 3—75c; 10—\$2.00

Keith's Fruit Trees—Northern Grown

Hardy

APPLES

YELLOW TRANSPARENT (Summer). One of the earliest apples to bear when trees are only 4 to 5 years old. Flesh white, crisp, juicy, mild acid. One of the best for eating out of hand and excels for apple sauce. Apples in July until September.

WEALTHY (Fall). Takes only 4 to 5 years to come into bearing. One of best for home or market, bears every year. Apples medium to large, rich brilliant red (slightly striped). Excellent quality, crisp white flesh, juicy. One for all-round purposes, eating, cooking, (sauce or pies). Ripens, through September and October. Keeps till Christmas.

McINTOSH (Fall and Winter). Like the Wealthy, bears early. Ripens in early October, keeps practically all winter. Often classed as winter apple. Flesh crisp, white, juicy, with that pleasing, appetizing, aromatic flavor that only McIntosh has. Deep, rich, crimson-red color. Really a fancy variety for home or market. Bears yearly.

DELICIOUS (Winter). One of the best-known apples. You'll see it on sale at all fruit stands and markets. Attractive dark red over a rich yellow subcolor. Large to very large. Flesh tender, white to yellow tinge, not acid (almost sweet). Bears early. Ripens in early October. Keeps all winter.

YELLOW DELICIOUS (Winter). One of the best yellow winter apples. Mild subacid, firm white flesh, golden yellow waxy color. Bears early (3 years), ripens early October, keeps all winter. Much like the Red Delicious except its clear golden color. Bears yearly.

JONATHAN (Winter). Everybody knows the Jonathan apple. Older and more popular than the Delicious. Always sells. Dark glistening red, firm crisp flesh, excellent quality, subacid, good winter keeper, season October to May. Bears young (3 to 4 years), productive, yearly fruiter, recommended for home or commercial purposes.

STAYMEN WINESAP (Fall-Winter). We include Staymen Winesap, often called just "Staymen," because it is such a good all-round apple for home uses—good eating, fine for pies, baked, sauce, or any other home use. Keeps all winter, bears yearly, productive. Uniform large, smooth-skinned apples, striped dark red underlaid with yellow tinge. Flesh firm, crisp, subacid to mild pleasing apple flavor. Buyers like it.

PEARS

BARTLETT (Late Summer). One of the best for quality. Good canner and eats well. Best known and most popular pear. Golden-yellow with catchy reddish-brown cheek. Flesh tender, juicy, delicious flavor. Trees vigorous growers fruiting young.

KIEFFER (Fall). Fruits every year. Trees very healthy, the one pear that can be grown without much spraying, if any. Fruits young, heavy yielder. Pears uniform, large, rich golden-yellow, firm flesh, keeps away into winter. Excellent shipper and commercial canner.

APRICOTS

Apricots, Hansen's Hardy. Can be grown anywhere in the U. S. Stands 50 below zero. Originated by Prof. Hansen, So. Dak. Expt. Station from seed collected in cold East Siberia. Grows and produces during dry hot weather. Vigorous grower, heavy cropper of large yellow sweet tender fruit. Fine for canning, "apricot honey," sauce, etc.

STANLEY PRUNE

(NEW) Prune type, excellent for cooking or eating out of hand. Fruits, large crop every year, tree healthy, vigorous grower. Fruit very large, dark blue thick bloom, with tender, juicy, firm, fine-grained. Very plum sweet. Free-stone. Fruits young, (3 years). Fast becoming a leading plum in the prune type, liked better than German Prune.

Each \$.75, 3 for \$2.10, 10 for \$6.50

Yellow Egg Plum

PLUMS

Burbank. The leader in the Japanese plums. Hardy, heavy fruiter, bears yearly. Deep purple-red fruit, pleasing excellent flavor. Early, ripens mid-Aug.

Yellow Egg. The best and best known yellow plum with large golden-yellow fruit; attractive, large, sweet pleasing flavor. Excellent for eating out of hand or cooking (Canned, jam, jellies, etc.). Trees hardy.

PEACHES

ELBERTA (Late). The best known peach. Standard for market, best of shippers. Stands cold winters better than others. Freestone, large, yellow with red cheek, juicy, best of flavor. A sure heavy cropper.

J. H. HALE (Late August). The largest peach grown, yet highly flavored, juicy, sweet. Golden-yellow flesh, fine grained, firm, excellent for eating or for canning. Color attractive deep-yellow with deep carmine cheek.

GOLDEN JUBILEE (Early August) New. One of the best early peaches. Large, golden yellow, with red cheek resembling Elberta. An extra good shipper for an early peach. Thrives and buds hardy. Freestone. Excellent flavor.

SOUTH HAVEN (Early August) An early attractive peach for home uses or market. Yellow with attractive red cheek. Stands severe winters. Dependable fruiter. Freestone, sweet peachy flavor. Fruits young.

HALE-HAVEN (Mid-August)

New. A cross between J. H. Hale and So. Haven. Has the size of the Hale with the productiveness of the So. Haven. It's sure a fine, valuable peach. Earlier than Hale or Elberta. Deep yellow color with tinted red cheek. Flesh yellow, firm and juicy, sweet peach flavor. Freestone, year-ly cropper.

Hale Haven
(New Peach)

SWEET CHERRIES

(Two of the best sure fruited)

BLACK TARTARIAN (Black)
Heavy fruiter, hardy, bears every year. Fruit tender, sweet, juicy; color attractive black. One of the best for home or market.

NAPOLEON (Yellow). Sometimes called "Royal Ann." The best yellow cherry, it's hardy sure cropper every year. Hardy, healthy grower. Fruit light lemon-yellow with red cheek, heart-shaped. An "Old Reliable."

SOUR CHERRIES

(The Two Leaders)

EARLY RICHMOND. Most popular early sour cherry. Fruit medium size, dark red, tart, real juicy. Good cooker, regular heavy cropper.

Black Tartarian Cherry

Napoleon Yellow Cherry

MONTMORENCY. Ripens in late June just after Early Richmond. Prolongs your cherry season. One of best market cherries, excellent for pies and canning. Thick juicy meat (lots of it), bright red, pleasing sub-acid flavor.

Keith's Evergreen Tree Sale

(Trees 8 to 12 in. high, 2-yr. transplants)

PYRAMID ARBOR VITAE. Upright Columnar growth, bright green dense foliage—50c.

COLORADO BLUE SPRUCE. Glistening light blue, very attractive—45c.

NORWAY SPRUCE. Very popular Spruce, fast growing, best for Xmas trees—21c.

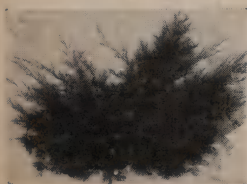

AUSTRIAN PINE. Very hardy, long attractive dark-green needles—25c.

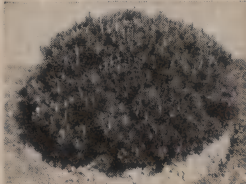

MUGHO PINE. Low globular dwarfish growth. New growths very pretty, like candles. 35c.

PFITZER JUNIPER. Graceful low-growing, spreading, attractive dark green—50c.

Special Offer

One each of the above (6 in all) **ONLY \$1.88**
Three each of the above (18 in all) **ONLY \$4.75**

We Offer Defense Saving Stamps on Cash Orders

This year we are cutting the cost on our customers' cash order and offering Defense Saving Stamps to cover the same. We are, in this way, taking less for our plants and turning the amount into Defense Saving Stamps which we will forward to the customer. The amount depending upon the size of the cash order. It may not be much in the case of some orders, but we feel that every stamp purchased will help just that much toward the great cause now before all of us. We will do our part by

offering you the reduction on your order, if you will accept same and instruct us to buy and send the stamps to you with your order acknowledgement.
This offer covers only those cash orders amounting to \$3.00 or more, and is not effective on orders mailed (post-marked) after April 11th, 1942. Should you not care to accept the Defense Saving Stamps, we will allow you to select additional stock to cover the same saving that the Stamps cover.

Your Choice of the Following Amounts in Defense Saving Stamps or in Additional Nursery Stock

AMOUNT OF CASH ORDERS

	Amount Allowed on Cash Orders Mailed		
	Before Feb. 15	By March 15	By April 12
On Cash Orders from \$ 3.00 up to \$ 5.00.....	\$0.40	\$0.30	\$0.20
On Cash Orders from 5.00 up to 7.00.....	.70	.50	.30
On Cash Orders from 7.00 up to 10.00.....	1.00	.70	.50
On Cash Orders from 10.00 up to 15.00.....	1.50	1.00	.70
On Cash Orders from 15.00 up to 20.00.....	2.50	1.50	1.20
On Cash Orders from 20.00 up to 25.00.....	3.50	2.00	1.50
On Cash Orders from 25.00 up to 30.00.....	4.50	3.25	2.20
On Cash Orders from 30.00 up to 40.00.....	5.70	4.50	3.30
On Cash Orders from 40.00 up to 50.00.....	7.00	6.00	4.50
On Cash Orders of \$50.00 or more.....	9.00	7.50	5.50

NOTE.—These Cash Offers do not apply on Special Offers (except on Blueberries and Kanner King), Bargain Offers, Combination Offers, or Special Prices listed in the Berry Book. The Defense Saving Stamps we send you will be accepted as cash on future orders sent in this season, (before June 1st, 1942).

Information for Customers

- 1.—USE ORDER BLANK, filling in all information.
- 2.—ORDER EARLY. Orders shipped as requested. First come, first served. To get plants shipped on requested date order early. You also get first choice at varieties, and benefit by our discounts.
- 3.—SHIPPING SEASON from late March until late May, depending on season. Also in Fall after we have had cold enough weather to harden plants.
- 4.—PLANTING SEASON. Set plants early as you'd make early garden and from then on until after corn-planting time. (When oak leaves are about size of squirrel's ears).
- 5.—REMITTANCE. Post Office Money Order or Express Money Orders are safer for you and most convenient for us. Send them when possible. But we gladly accept your check, Bank Drafts, etc. Letters containing Currency should be REGISTERED. C. O. D. shipments will be made if one-third is sent with order.
- 6.—YOUR PROTECTION. We guarantee safe arrival, but do not hold ourselves responsible for negligence of damage in transit. We replace orders to the

- extent of damage or loss if customer sends within five days statement from Exp. Agent or Postmaster showing extent of same. Parcel Post shipments must be insured if loss is to be recovered. Raspberry and other cane plants travel at customer's risk ordered shipped after May 1st and strawberry plants after May 15th.
- 7.—EXPRESS SHIPMENTS now have a special cheaper rate for strawberry plants. This makes Express shipments cheaper than Parcel Post on most orders, and besides Express shipments are always insured against damage or loss. This costs extra by Parcel Post. By Express plants travel better as they are not in tight closed mail bags. They have plenty of ventilation and are not so subject to heating. We suggest, when possible, have your shipments come by Express.
- 8.—PARCEL POST SHIPMENTS. Small orders can be sent as cheap by Parcel Post, especially into States in Groups 1 and 2. Distant shipments are more expensive. Parcel Post shipments are not insured. This costs extra. The Parcel Post tables give postage to add. See bottom of page.

STATE GROUPS For Parcel Post

- For your convenience in determining Parcel Post costs we make four groups of States as follows:
- Group No. 1 includes Mich., Ohio, Ind., Ill., Wis.
 - Group No. 2 includes Ia., Mo., Pa., Minn., N.Y., Del., N.J., Va., Tenn., Ky., Md., D.C.
 - Group No. 3 includes N. and S. Dak., Nebr., Kans., Okla., Ark., Texas, Mont., Wyo., Colo., N.M., La., Miss., Ala., Ga., Fla., N. and S. Car., Maine, N.H., Vt., Mass., R.I., Conn.
 - Group No. 4 includes Idaho, Utah, Nev., Ariz., Wash., Ore., Calif.

Note what group your State is in, then refer to Parcel Post Table below for postage to add if your shipment is to come by Parcel Post.

Those who are planning on sizeable orders should send us your list of wants for a special allowance. We would be pleased to quote you on any order that you may select from this Berry Book.

Plants Required Per Acre

	Width of Row	Plants in Row	Plants Per Acre
Strawberries (field culture).....	3 ft. 8 in.	18 in.	8,000
(garden culture).....	3 ft.	18 in.	9,700

KEITH PLANT NURSERY

"Strawberry & Blueberry Headquarters"

SAWYER,

MICHIGAN

PLACE
STAMP
HERE

Dear Friends:

To have printed our Berry Book it's full usual size this year, would have taken nearly five acres of printing surface,, BUT the trimming off the unnecessary edges to the very type edge, many pounds of needed paper were saved enough to make many shell casings for our defense guns. We realize that this trimming makes our Berry Book not as attractive as usual, but a saving was made, thereby, for a good cause. A saving is also passed on to you on page 22 in this Berry Book, and for THIS saving we are offering you Defense Savings Stamps.

NEW!

A Thornless BOYSENBERRY

Absolutely NO "Stickers"
Canes Smooth as Grape vines

NOW You can pick and handle Boysenberries without gloves. This new discovery has revolutionized the growing of this luscious wine-red berry. The great drawback before was those vicious thorns. Now the berries can be picked and vines handled without gloves, for the canes and stems of Keith's Thornless Boysenberry plants are absolutely thornless,—as smooth as grape vines.

Berries Liked By Everybody

Berries wine-red and fully twice as large as blackberries, up to 2 inches long. Ideal for home uses, have that "raspberry-blackberry" flavor, unlike any berry you have ever tasted, liked by everybody. They make the best of pies, jams, etc., and are delicious canned. Commercial canners want them above any other berry. When you taste Thornless Boysenberry, either fresh, in pies or canned, you will never be without them—and they are so easily grown in your garden or field.

How to Grow Boysenberries

Culture of the thornless or thorny Boysenberry is the same. Set the plants 8 by 8 feet and cultivate as any bush fruit. Tie the vines (canes), in the spring, on wires stretched over top of posts 3 ft. above ground. Allow the young canes to remain on the ground all winter. Cut out the old canes as soon as fruiting is over and take from field and burn. Set about 700 plants per acre. They can be grown along and tied to garden fence.

PRICES Lowest Ever. Plants of the Thornless Boysenberry have been very costly but now we can list them the lowest ever. Keith's Thornless Boysenberry plants cost no more than what you would have to pay for thorny plants elsewhere.

\$8.00; 500 for \$16.00;
1000 for \$30.00.

Boysenberry is a new creation resulting from crosses between the Raspberry, Blackberry and Loganberry. It grows long vines like the dewberry and is easily grown. It is very profitable, for the berries are in great demand everywhere.

THE BERRIES

The berries are very large (2 in. long or more), wine-red with a pleasing, catchy flavor, unlike any one other berry. They are very juicy, unexcelled for pies, jams and the like.
